## **DETAILED ACTION**

### ***Response to Amendment***

1. The amendment filed on 3/21/2005 has been entered.

It is noted claim 21 was presented with only single spacing but should have been provided with 1 ½ or double spacing, see 37 CFR 1.52(b)(2). Applicant next response should follow 37 CFR 1.52(b)(2).

### ***Specification***

2. The disclosure is objected to because of the following informalities:

Paragraphs 07, 08, and 09 need to be amended to include the serial numbers of the related applications.

Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 21 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The amendment to this claim at line 7 does not clearly claim the contents of the inner box. At line 3 this claim claims "a portion of the image is displayed" and at line 7 this claim claims "the portion of the displayed image". These are different portions since

Art Unit: 2672

the first is a portion of the image and the second is a portion of the portion or applicant may be claiming the off-screen portions claimed at lines 3-4 is displayed in the inner box. Thus, this claim does not clearly claim a miniature representation of the displayed image.

At line 7 this claim does not clearly claim if the "nodes" at this line are the same nodes found at line 2 or different nodes.

At line 7 "a miniature version of the portion of the image on the display screen" and at line 14 "lines from the inner box" do not clearly claim the contents of the inner box. It appears applicant intends for line 14 to claim "omitting display of the lines ~~from~~ interconnecting the nodes displayed within the inner box and the navigator box."

This claim was amended to claim at line 2 "one or more nodes" and at lines 3 and 7 "nodes". When there is only one node then "nodes" is unclear and "lines are used to interconnect the nodes" is also unclear.

Applicant needs to review claim 21 in its entirety and amend it or rewrite it to clearly claim the disclosed invention.

### ***Claim Objections***

5. Claim 21 is objected to because of the following informalities: At line 4 a colon should follow "comprising". Appropriate correction is required.

***Allowable Subject Matter***

6. Claim 21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action. The prior art of record fails to teach or suggest omitting display of the lines interconnecting the nodes displayed within the inner box and the navigator box that represent the entire image including the displayed portions and the off-screen portions.

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
